

Suitable species

Suitable for feeding most species of pigs during breeding and maintenance

Benefits

- Designed to restrict excess energy intake which is known to decrease lifespan and cause ill health.
- Expanded pellet structure for improved palatability and dental health.
- No non-nutritional feed additives, such as antibiotics and growth promoters.

Ingredients

Oat Hulls and Bran, Barley, Wheat, Soya Bean Hulls, Wheat Feed, Dehulled Extracted Toasted Soya, Molasses, Sunflower Extracted, Minerals and Vitamins.

(Ingredients may be subject to change due to seasonal availability)

Feeding recommendations

Feed to appetite in the young animal. Restrict diet intake in the adult.

It is recommended that this diet represents a minimum of 70% of the dry matter intake, so other root and green vegetables, and forages should be offered to make up the other 30%.

Restrict feeding may be necessary in the older and adult animal where they are predisposed to eat more than they require (which can result in excess fat deposition and ill health).

For young, growing and lactating animals

For small animals offer ad-libitum / to appetite (making sure they are not getting excessively fat).

For larger animals offer a minimum of ~2.75% of body weight/ day i.e. for a 100Kg animal offer 2.75Kg/day.

For maintenance or gestating animals – much less feed is required.

For small animals offer 1.25 -2.25% of bodyweight i.e. for a 20Kg animal offer 0.3Kg.

For larger animals offer 1-1.5% of bodyweight i.e. for a 100Kg animal offer 1.25Kg.

Calculated analysis

(Unless otherwise stated nutrients are expressed as total calculated levels)
