Suitable species

Reindeer and similar species

Benefits

- Small pellet size for greater acceptability.
- Adequate levels of Vitamin E and Selenium.
- Contains 2.5% Sodium Bicarbonate which helps prevent acidosis and supplies bicarbonate ions which are essential for cellulytic bacteria.

Ingredients

Barley, Wheat, Wheat Feed, Grass Meal, Oat Hulls and Bran, Sodium Bicarbonate, Soya Bean Oil, Vitamins and Minerals.

(Ingredients may be subject to change due to seasonal availability)

Feeding recommendations

Designed for Ad-Lib feeding throughout the year. Adequate good quality hay and browse should also be provided. The animals will adjust food intake from virtually nothing during winter to about 5Kg, or more, per animal per day during summer and prior to the rut. During rut, food consumption reduces considerably and animals may lose some of their body condition but this should be regained by increased food consumption for the short period after the rut.

During winter and early spring the animals will eat very little and will dramatically lose body condition. This is natural and, provided the animals are healthy, with good deposits of back-fat at the onset of winter, there will be no deleterious effects.

Additional information

Modified from a formula provided by Mr Richard Knock at the Zoological Society of London, Whipsnade Park.
