

HIGH FIBRE MAMMAL

Suitable species

For the maintenance of animals that consume high fibre plant based diets

Benefits

- Contains very high fibre, ~25% crude fibre.
- Encourages normal digestive function.
- A complete diet balanced to include vitamins, minerals and trace elements.
- Especially useful for herbivorous animals that require a low starch level (Starch ~8%).
- The high level of fibre means minimal high fibre/forage supplementation is required.
- A combination of 7 different fibre sources limits seasonal variability that is inherent to any one fibre source.

Ingredients

Soya Bean Hulls, Oat Hulls and Bran, Sunflower Extracted, Grass Meal, Dehulled Extracted Toasted Soya, Barley, Minerals, Vitamins.

(Ingredients may be subject to change due to seasonal availability)

Feeding recommendations

Normally fed to appetite but rationing the diet can also be practised.

May be fed with supplementary forage.

Note: this diet is not suitable for animals that are sensitive to copper levels such as sheep.
